PARTH SARANGI

Business Intelligence & Analytics Manager | AI Agents, GenAI Insights & Data Modeling
Bangkok, Thailand | +66-0984547463 | parth.sarangi@gmail.com | linkedin.com/in/parthsarangi

PROFESSIONAL SUMMARY

BI manager at Lazada (Alibaba International Digital Commerce), where I lead AI and customer-experience analytics across chatbot, voicebot and human support. Eight years across e-commerce, fintech and capital markets — turning messy operational data into models, metrics and agents that make the next decision obvious.

SKILLS

AI & Advanced Analytics: AI Agent Development, Generative AI, Machine Learning, Predictive Modeling, Churn Prediction, Anomaly Detection, NLP for CX, Forecasting, Statistical Analysis

BI & Data Modeling: Data Governance, Data Quality Standards, Kimball Dimensional Modeling, One Big Table (OBT), Data Warehouse Design, Data Marts, Data Pipelines, ETL/ELT

Visualization: Tableau, Power BI, Looker Studio, AWS QuickSight, Alibaba QuickBI, Sisense, Metabase, Google Analytics 4, Executive Reporting

Data Engineering: SQL (Advanced), Python, dbt, Hevo Data, AWS Redshift, Google BigQuery, Databricks, Alibaba MaxCompute

Product & Delivery: Agile/Scrum, SDLC, User Stories, Backlog Management, Stakeholder Management, Requirement Gathering, A/B Testing, KPI Design, Self-Service Analytics, Process Automation, Cost Optimization, Data Storytelling

PROFESSIONAL EXPERIENCE

Alibaba International Digital Commerce (Lazada SEA) | Bangkok, Thailand
Manager, Business Intelligence (AI & CX Analytics Lead) Feb 2025 - Jul 2026

- Built and deployed AI agents that generate daily data insights and executive summaries automatically, and added push alerts for abnormal spikes in chat and voice contact volume, cutting response time to critical issues by 30%.
- Own CX and BPO analytics across chatbot, voicebot, and human agent channels, defining the KPI framework that guides workforce allocation and improves first-contact resolution.
- Integrated logistics data with customer feedback to isolate delivery pain points, then built predictive models that forecast contact-volume spikes from logistics delays, enabling proactive customer communication.
- Directed data modeling and governance for CX KPIs, holding consistency across the e-commerce, voucher, and payment domains and setting data quality standards for customer interaction logs.
- Partner with CX, Logistics, and Technology leadership to convert business requirements into AI/BI solutions, running self-service workshops that demonstrate the value of AI-driven insight.

Pi Securities | Bangkok, Thailand
Associate Director, Business Intelligence Jan 2023 - Sep 2024

- Architected a hybrid Kimball and One Big Table model for stock trading, funds, and structured notes data, optimizing query performance for analyst and portfolio workloads.
- Delivered automated QuickSight and Tableau dashboards exposing real-time SET Thailand market trends and portfolio performance to traders and investment teams.
- Built the funds holding dashboard for fund managers - recommended funds, AUM, subscriber base, and performance indicators in one view, with flags on customers at risk of redeeming.
- Ran the BI backlog end to end, writing user stories and facilitating sprint planning with data engineers and business users in Jira and Confluence.
- Led self-service BI workshops for traders and analysts, raising tool adoption and data literacy across the department.

DF Marketplace (Kaidee.com) | Bangkok, Thailand
Senior Data and Business Intelligence Specialist Dec 2021 - Nov 2022

- Analyzed web and app traffic and lead-generation funnels in Google Analytics 4 (GA4) and SQL, identifying drop-off points that informed conversion-rate optimization.
- Built attribution models joining Google Ads data to internal revenue databases, giving marketing a ROAS view for ad-spend decisions.
- Shipped interactive dashboards covering finance, revenue, listings, and feature usage that shaped product roadmap prioritization.
- Defined KPIs with product and engineering and validated feature impact through A/B testing and historical trend analysis.

Space Next Door | Bangkok, Thailand
Business Intelligence Manager Apr 2021 - Nov 2021

- Implemented One Big Table architecture in AWS Redshift, reducing join complexity and improving dashboard load times by 40%.
- Resolved inventory and lead data discrepancies with technology and sales teams, and built automated data pipelines for recurring ingestion.
- Standardized data management practices across Thailand and Singapore operations for consistent cross-market reporting.

Ascend Corp (TrueMoney) | Bangkok, Thailand
Senior Data Service Engineer Jul 2018 - Mar 2021

- Designed SQL scripts and data models for the International Wallet business, managing data pipeline ingestion intervals and availability of the reporting layer.
- Produced quarterly performance reports and dashboards on cross-border money transfer volumes and user engagement.
- Managed local BI staff and served as primary liaison between business departments and technical teams for requirement translation.
